Question 1

Correct

Mark 1.00 out of 1.00

Given an array of N integer, we have to maximize the sum of $arr[i] * i$, where i is the index of the element ($i = 0, 1, 2, \dots, N$). Write an algorithm based on Greedy technique with a Complexity $O(n \log n)$.

Input Format:

First line specifies the number of elements- n

The next n lines contain the array elements.

Output Format:

Maximum Array Sum to be printed.

Sample Input:

5

2 5 3 4 0

Sample output:

40

Answer: (penalty regime: 0 %)

```

1  #include<stdio.h>
2  int main()
3  {
4      int n,temp,sum=0;
5      scanf("%d",&n);
6      int a[n];
7      for(int i=0;i<n;i++)
8          scanf("%d",&a[i]);
9      for(int i=0;i<n;i++)
10     {
11         for(int j=i+1;j<n;j++)
12         {
13             if(a[j]<a[i])
14             {
15                 temp=a[i];
16                 a[i]=a[j];
17                 a[j]=temp;
18             }
19         }
20     }
21     for(int i=0;i<n;i++)
22         sum+=(a[i]*i);
23     printf("%d",sum);
24 }
```

	Input	Expected	Got	
✓	5 2 5 3 4 0	40	40	✓

	Input	Expected	Got	
✓	10 2 2 2 4 4 3 3 5 5 5	191	191	✓
✓	2 45 3	45	45	✓

Passed all tests! ✓

Correct

Marks for this submission: 1.00/1.00.
